

Ayesha Munir

AI/ML Engineer | Software Engineer | Frontend Developer

Santiago de Compostela, Spain | +34 602 875466 | ayeshamunir.dev@gmail.com | linkedin.com/in/ayesha-samad

PROFESSIONAL SUMMARY

Software Engineer and AI Software Engineer with almost 5 years of experience across web applications, mobile apps, IoT systems, healthcare AI tools, clinical trial AI support systems, workforce management, logistics, counseling platforms, and client based software. Strong background in React, Next.js, React Native, TypeScript, JavaScript, Python, REST API integration, WordPress, Agile/Scrum, and UI implementation. Current role at IIS Galicia Sur includes clinical trial tools built with LLMs, RAG pipelines, vector databases, Ollama, OpenRouter/Gemini APIs, and healthcare data workflows. I work with backend engineers, QA teams, research teams, clinical stakeholders, onsite teams, and clients to build usable and maintainable software.

PROFESSIONAL EXPERIENCE

AI Software Engineer / Research Collaborator

IIS Galicia Sur

Apr 2025 - Present

Pontevedra, Spain

- Build healthcare AI and software tools for research teams, with focus on clinical trial AI support, information retrieval, and health data workflows.
- Developed clinical trial support tools using RAG pipelines, vector databases, LLMs, prompt design, Ollama, OpenRouter, and Gemini.
- Work with structured and unstructured health information to support clinical trial search, question answering, and research information access.
- Support API based integrations, documentation, testing, and collaboration with clinical, research, and technical stakeholders.
- Worked with WordPress for research web pages, content updates, and project visibility, separate from the clinical trial AI system.
- **Project: Clinical Trial AI Support System.** Built RAG and LLM based workflows using vector databases, APIs, prompt design, local/API based models, and structured retrieval to support clinical trial information access.
- **Project: Research Web Support.** Supported WordPress based web pages and content updates for research communication and project visibility.

Senior Software Engineer

TEO International, Denmark based

Sep 2022 - Oct 2024

Islamabad, Pakistan

- Delivered production web and mobile features using React, React Native, TypeScript, JavaScript, Formik, Yup, Axios, and REST API integrations.
- Collaborated with Agile teams, backend developers, QA engineers, onsite stakeholders, and clients to develop, test, review, and maintain applications.
- Built reusable frontend components, improved UI/UX quality, handled sprint tasks, supported technical reviews, and prepared features for QA and release.
- Worked on IoT based access control products for Danish clients, including mobile app flows and web based admin control panel features.
- **Project: Symbion Mobile App.** Developed React Native mobile app features for an IoT based office door lock system where users can operate locks through Android and iOS apps. Links: [Android app](#), [iOS TestFlight](#).
- **Project: ShareLocks Control Panel.** Developed React based control panel features for managing locks, users, and organizations connected with Symbion and backend access control workflows. Link: [ShareLocks web app](#).

Software Engineer

Alberuni Technologies, Netherlands based

Jun 2022 - Aug 2022

Islamabad, Pakistan

- Developed frontend components for workforce management products using React, Ant Design, JavaScript, HTML, CSS, and microfrontend concepts.
- Worked in sprint based delivery with cross functional teams to improve usability, complete assigned features, and prepare client handovers.
- **Project: Stratex Workforce Management System.** Worked on a workforce management system used for company records, employee workflows, HR, field service management, scheduling, training, forecasting, budgeting, and analytics. Link: stratex.nl.
- **Technologies:** React, Ant Design, JavaScript, HTML, CSS, Jira, VS Code, Visual Studio, microfrontends.

Software Engineer

IneffableDevs, UK based

Mar 2021 - Jun 2022

Islamabad, Pakistan

- Built React based web applications for UK facing products and supported production quality frontend releases in Agile/Scrum teams.
- Implemented reusable UI components, API integrations, forms, validation, Material UI screens, and release support.

- **Project: VANGO Luggage Transfer Platform.** Developed user and driver web app workflows for a luggage transfer platform with separate sections for customers, drivers, and service operations. Links: [user app](#), [driver app](#).
- **Technologies:** React.js, Formik, Yup, Axios, JavaScript, Material UI, API integration, Trello, Git Bash, GitLab, Jenkins.

Trainee Software Engineer

TIPS x NR Soft

Jun 2020 - Feb 2021

Islamabad, Pakistan

- Developed government and counseling web application features using React, Firebase, Bootstrap, JavaScript, PWA concepts, Formik, Yup, and API integration.
- Supported frontend development, production issue analysis, sprint delivery, debugging, user support, and pressure handling with senior team members.
- **Project: Pak Future PWA.** Created a student counseling progressive web application that provides institute information in Pakistan and supports social emotional learning needs for higher studies.
- **Technologies:** React.js, Firebase Firestore, Firebase, Formik, Yup, Axios, Bootstrap, JavaScript, PWA, Trello, Git Bash, GitLab, Visual Basic.

CORE TECHNICAL SKILLS

AI and Data:	Python, LLM applications, RAG pipelines, vector databases, prompt design, Ollama, OpenRouter APIs, Gemini, transformer based workflows, healthcare AI, clinical trial AI tools, structured and unstructured data, data quality workflows, computer vision, domain adaptation
Frontend:	React, Next.js, React Native, TypeScript, JavaScript, HTML, CSS, Material UI, Ant Design, Fluent UI, Redux, Formik, Yup, Axios, Bootstrap
Web and APIs:	REST API integration, Firebase Firestore, WordPress, dashboards, PWA, microfrontends, responsive web applications, API based systems
Tools:	Git, GitLab, Git Bash, Azure DevOps, Jira, Trello, Jenkins, VS Code, Visual Studio, Agile/Scrum, documentation, QA collaboration, production support

EDUCATION

M.S. in Artificial Intelligence | University of Santiago de Compostela, Spain2024 - 2026

Final semester; expected completion July 2026. Academic work includes machine learning, deep learning, natural language processing, LLM systems, computer vision, biomedical image analysis, robotics/planning, data science, and AI research methodology. Master’s thesis focuses on image homogenization and domain adaptation to improve the generalizability of machine learning models in fetal medicine.

B.S. in Computer Science, Specialization in Software Systems | Federal Urdu University of Arts, Sciences & Technology, Pakistan2017 - 2021

CGPA: 3.84/4.00 | Gold Medalist | Topper Awards: 2018, 2019, 2020, 2021. Academic foundation includes software engineering, databases, algorithms, requirements analysis, software systems, web development, mobile development, and team based project delivery.

ADDITIONAL INFORMATION

Certifications:	MERN Stack Developer Certification; React Developer Certification from W3Schools.
Training:	Research Data Management training by EP PerMed and ELIXIR at ANR, Paris, focused on responsible biomedical data use, data sharing, and personalised healthcare.
Languages:	English: Professional working proficiency; Spanish: A2
